

ADACO EMPORIUM™: COMPREHENSIVE RETAIL SOLUTION

For retail operations: manage procurement, inventory control, analysis and reporting

Emporium is a scalable software tool for end-to-end procurement management, inventory control, and retail-analysis and reporting. Intended for single businesses. Emporium™ is the result of several years of development, including intensive analysis of the world's leading hospitality and foodservice establishments. The resulting software is a comprehensive retail solution that automates Procurement, manages materials, analyzes profitability, and much more.
