

### Overview

- Advanced label design and integration software
- Best choice for label printing in an enterprise environment
- RFID label printing
- Buyers are typically IT
- Sold by TSP, TCI, TCD partners

With TEKLYNX CODESOFT® 8 barcode label design software, you can easily integrate barcode label printing into your business environment, dramatically enhancing both efficiency and control. Whether your goal is managing assets and resources, controlling distribution channels and stock levels, tracking documents, or managing data records, CODESOFT 8 barcode label design software provides a powerful solution for your organization's most advanced labeling projects.

With CODESOFT 8 you can design RFID Labels in a user-friendly interface. CODESOFT prints and programs RF Labels simultaneously and complies with all RFID market standards, such as EPC (SSC, SGTIN, DOD, etc.), Philips I-code and TI Tag-IT. Add new standards and tag support with simple online updates- CODESOFT 8 is ready for the future.
