Transight Headquarter (HQ) is a Restaurant Management business solution software designed for the management of chain restaurants in the Fast Food and Hospitality industries. When you have more than one outlet, maintaining uniformity is a challenge. Coordinating changes in inventory, menu items, recipes, processes and promotions is crucial. Transight HQ Restaurant Management software, installed at you headquarters, helps manage your chain outlets by standardising database fields and exporting these settings to an FTP site for download by the relevant store outlets.

Key Modules

Headquarters Module – Defines inventory-related database and system settings for Transight HQ modules

Transight HQ POS Configurator Module – Defines Transight POS configurator database settings to be sent to your store outlets and Transight POS and configurator control settings for the front end POS

Report Writer Module – Runs auto sequences, generates reports and journals, and allows the viewing of event logs for Transight HQ and each store outlets

What Transight HQ can do for you:-

Speedy Information for Decision Making

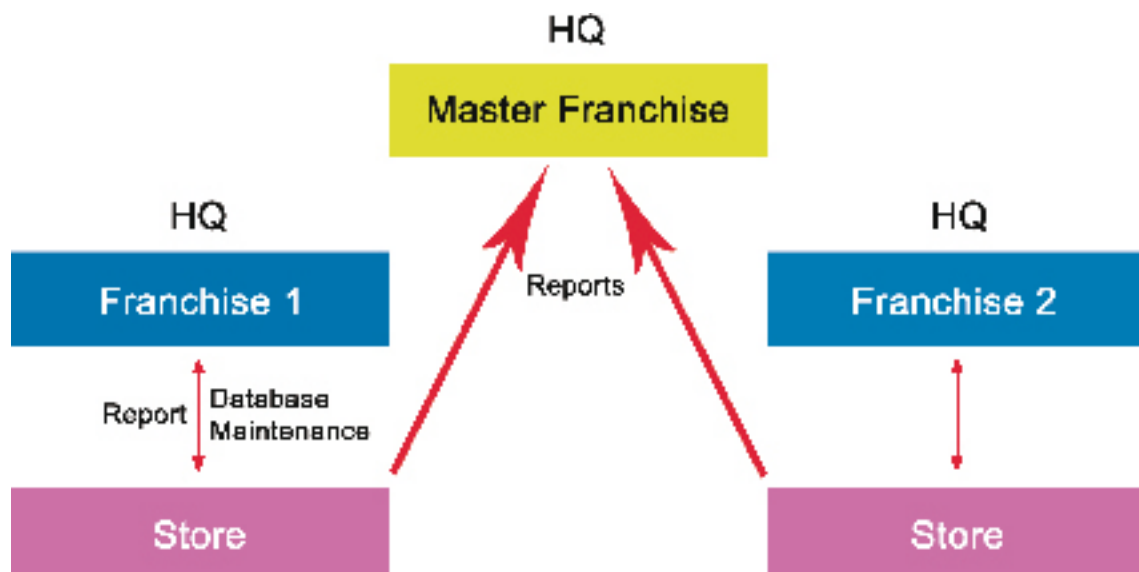

- Effortless daily collection of information from multiple stores
- Automatic transfer of information executed daily at a specific time
- Automatic generation of update files to synchronise the data between HQ and stores

Effortless Administration and Maintenance

- Centrally maintain multiple store databases
- Remotely administer stores information
- Pre-programmed update of promotions, price changes and other information

Accurate Reporting

- Ability to consolidate information to generate consolidated reports
- Generate reports on sales analysis and menu mix which portrays the overall picture of sales revenue and company's performance
- Easy generation of closed check journals for auditing purposes
- Powerful Business Intelligence engine provides the interface with Microsoft Excel for ease of analysis and management of information in relation to charts, graphs and other visuals

How HQ Works
