Transight Manager is a Back Office Automated Restaurant Management System that helps manage your costs and inventory. Transight Manager works with your Point-of-Sale systems by polling the sales transactions captured by these front-end systems, specially tailored for the Table Service Restaurant segment. It also enables integration into Transight HQ for Enterprise Wide Solutions if you are operating a chain restaurant.

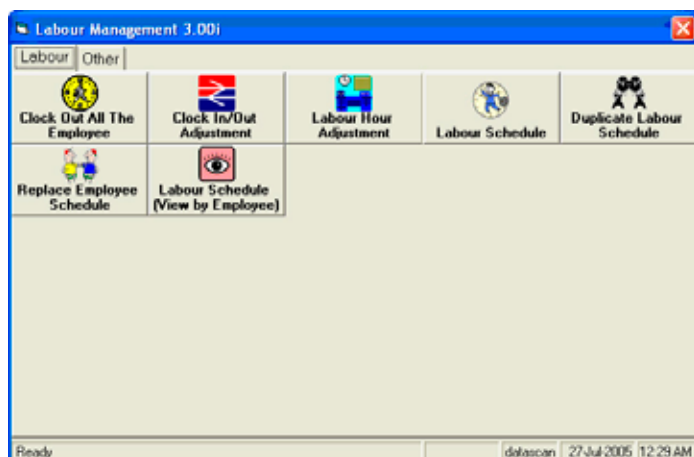

Key Modules

Inventory Management -- a true F&B inventory module that keeps track of your inventory and food cost accurately by defining recipe, yield and unit of measurement. This module allows for balancing of your stocks in real time as well as calculating the requirement levels for recipes in relation to customer orders.

Cash Management – keeps track of all your expenditure, cash movements and banking activities. Useful in minimising retained money in each store and helps reduce losses through unforeseen circumstances.

Labour Management – handles time and attendance for all your employees and to monitor and manage your labour cost. This is especially useful in measuring productivity rate and payroll calculation which includes overtime.

Supply Chain Management – helps you manage HQ ordering, receiving and movement of supplies to the stores. Managing multiple stores has never been easier!

Warehouse Management – if you have a warehouse with simple operations, save your money...you need not look for a separate system. This module helps manage your warehouse stocks and the movement from supplier to store.

Membership & Customer Relationship Management (CRM) – keeps customers happy and keep them coming back by maintaining relationship and communication. Get ahead with the ability to analyse your customers' market segment and buying habits to improve sales and profitability.

What Transight Manager can provide you:-

- Suitability for any type of F&B Operation
- Projections based on past sales and past performances to assist in Smart-Ordering of raw materials
- Accurate comparisons between budgeted and actual performance to help you manage your profitability
- Effortless integration with hand-held for stock take
- A GST ready system! Future-proof your business with this new feature!
